## **BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning documents *will not* correct images,  
please do not report the images to the  
Image Problem Mailbox.**

1 Session 11: numerical databases: Knowledge-Based Report Generation: a tech  
generating natural language reports from databases

Karen Kukich

June 1983 Proceedings of the 6th annual international ACM SIGIR conference on Research  
retrieval

Full text available: pdf(516.10 KB)

Additional Information: full citation, abstract, refere

Knowledge-Based Report Generation is a technique for automatically generating natu  
databases. It is so named because it applies the tools of knowledge-based expert sys  
generation. The technique is currently being applied to the design of an automatic na  
generator. Examples drawn from the implementation of the stock report generator a  
of a knowledge-based report generator.

Keywords: databases, knowledge-based expert systems, natural language processing

2 TAGINE, an interactive tool for report generation

Colette Yazigi

September 1981 ACM SIGAPL APL Quote Quad , Proceedings of the international conferen

Full text available: pdf(495.42 KB)

Additional Information: full citation, abstract, references, ind

This paper describes an APL tool designed as an aid to report writing. Using APL form  
the report formatting phase of a business application program is often very long: TAC  
quick and easy programming of reports. TAGINE is divided into two modules: 1 - TAN  
intended for describing computations to be performed, and building a model of the fi

17 Session I - supporting face-to-face groups: A group decision support system for analysis in organization planning

Lynda M. Applegate, Benn R. Konsynski, J. F. Nunamaker

December 1986

Proceedings of the 1986 ACM conference on Computer-supported coo

Full text available:  pdf(1.38 MB)

Additional Information: full citation, abstract, reference

The increasing reliance on group decision-making in today's complex business enviro microcomputer, telecommunications and graphic presentation technology have comb the design of group decision support systems (GDSS). Planning is an important group organizations. Effective planning depends on the generation and analysis of innovativ generation and management process has been ...

18 Automatically extracting structure and data from business reports

Stephen W. Liddle, Douglas M. Campbell, Chad Crawford

November 1999 Proceedings of the eighth international conference on Information and k

Full text available:  pdf(1.04 MB)

Additional Information: full citation, abstract, references, index

A considerable amount of clean semistructured data is internally available to compan However, business reports are untapped for data mining, data warehousing, and que relational form. Business reports have a regular structure that can be reconstructed. automatically infer the regular structure underlying business reports and automatical relational data.

Keywords: automatic wrapper generation, business reports, data and information ex structure

- 19 ITiCSE 2000 working group reports: Distributed expertise for teaching computer organization & architecture course(s) in the undergraduate computer science curriculum  
Lillian (Boots) Cassel, Mark Holliday, Deepak Kumar, John Impagliazzo, Kevin Bolding, Mark S. Wolffe, William Yurcik  
June 2001 Working group reports from ITiCSE on Innovation and technology in computer organization & architecture course(s) in the undergraduate computer science curriculum  
Full text available:  pdf(1.89 MB) Additional Information: full citation, abstract, references, comments

This report presents preliminary results from our project on creating distributed expertise for teaching computer organization & architecture course(s) in the undergraduate computer science curriculum. We conducted an online survey designed to gather information from faculty on the current state of teaching computer organization & architecture course(s) in the undergraduate computer science curriculum. We tried to identify specific areas of need for creating distributed expertise as reported by several resources that have been identified.
